

A VISION FOR GOOD FOOD

As well as being tasty, healthy, affordable and accessible, the food we eat should be good for nature, good for workers, good for local communities, good for local businesses, and good for animal welfare.

EATING BETTER

People of all ages and backgrounds can learn new skills and experience the pleasure and benefits of growing, cooking and choosing good, nutritious food.

- Skills to cook, grow and choose climate-friendly, healthy food are taught in all schools
- Opportunities for developing skills in cooking, growing and choosing good food are available in all communities
- Healthy and climate-friendly food is served in catering, retail and hospitality settings
- Early years nutrition support for parents has increased

LOCAL FOOD ECONOMY

PROCUREMENT

Procurement from suppliers of local, regional and sustainable provenance is widespread.

- Procurement from local and regional suppliers has increased
- Organisations have implemented sustainable food procurement standards
- Hospitality and catering organisations use carbon footprinting to reduce the greenhouse gas emissions of the food they procure

INFRASTRUCTURE

Independent food businesses are supported, while local, regional and sustainable food is accessible to everyone.

- Training opportunities and employment conditions have improved with more diversity among staff
- Carbon emissions from food distribution have reduced
- Local, sustainable, culturally appropriate and nutritious food is accessible and affordable for all citizens
- The economic contribution of the local food economy continues to grow and more food businesses remain open

FOOD WASTE

Food waste and packaging waste is minimised.

- Household food waste going into black bins has reduced to less than 10%
- Commercial food waste reduces and the volume of food waste recycled increases
- The volume of food surplus redistributed increases
- The volume of single-use packaging reduces and reusable cups are the norm

URBAN GROWING

More people are growing more nutritious, sustainable and culturally relevant produce.

- The most suitable land for growing has been identified and protected
- The volume of land used for growing has increased significantly
- Training and economic support for growers has increased, alongside the diversity of people growing food and the number of growers
- More routes to market are available for growers
- Community-based and commercial food production on tenanted land uses nature-friendly techniques

FOOD JUSTICE

- Fair and equitable access to good food with choice and security is a reality for all citizens
- People and communities are equipped with the necessary food knowledge, skills and facilities to eat well
- Food is at the heart of community, economy, and city planning

GOVERNANCE

Disaster Risk Reduction: An emergency food provision plan for future disasters has been developed

Food Systems Data: Data to monitor and assess food systems change is continually gathered and analysed
